Subject: RE: My approach to the report writing

Folks,
Barren Fork and Flint Creek also have the 0.037 mg/L applicable standard.
From title 82 Paragraph 1452
The Flint Creek and the Illinois River above the confluence of the Barren Fork Creek in Cherokee, Adair and Delaware Counties;
2. The Barren Fork Creek in Adair and Cherokee Counties from the present alignment of Highway 59 West to the Illinois River;
Can we get these added to the Oklahoma side?
Please let me know.
Taim.

Subject: My approach to the report writing
Sabu/Taim –

I'm writing our portions of Section 5 directly within the 'Outline' file you provided ... and when I finish our sections I will rename the file and send it back to you to complete the other sections of the report. Let me know if you want me to proceed differently, or take a different approach.
I hope to complete our pieces of Section 5 by Friday COB and send it out to you.
If we have any remaining hours next week, we can help fill in some of the other sections, and/or review any other sections you would like us to review. Of course, we will be happy to review the doc if needed after the contract ends, but that would need to be on our own time.
So, get back to me ASAP if you want me to approach this differently.
Thanks,
Tony
